

## **Listening and Voice Training Workshop Friday June 9<sup>th</sup> from 16-19h**

### **The Importance of the Teacher's Voice in Learning**

Learn to place your voice so you will be heard, while reducing fatigue which results from intensive use of your voice in the classroom setting.

Speak so students become more attentive and learn better.

Practical exercises are proposed relative to the difficulties and restrictions of your teaching activities. Answering your questions is part of the program.

#### **Presented by Aline JAILLET**

Tomatis Consultant, lyric singer and voice instructor for speech and singing, has run the Listening and Voice Center in Rennes (France) for 10 years and is a Tomatis trainer for the centers in Paris, Martinique and Rolle.

She accompanies amateur and professional singers, university teachers, trainers and artists in the placement of their voice. This enables a more authentic expression of self, emotions and the message.

For many years Aline has been interested in the links between the body, the ear and voice. Her research led to numerous conferences and articles in specialized publications. She just wrote a book on "Voice and the Inner Self".

#### **Location**

#### **Tomatis Listening Center**

17, chemin du Couchant, 1180 Rolle
