Securserv Technologies SA is an innovative Swiss company based on experienced personalities. Securserv contributes in particular to the protection of citizens, institutions and companies.

OUR TEAM

Our team represents more than 90 years of experience in the military security world of the various Forces, or private. We are multilingual, ready to provide advice in French, German, Italian, English, Spanish, Hebrew and Arabic.

Its members include Mr. Daniel Berger, General Officer of the Swiss Army and former Military Adviser to the Head of the Defence Department (Minister), and Mr. Patrick Mayer, former senior executive of a private security company, senior officer in the Swiss Army and former Director of the Geneva Chamber of Commerce, Industry and Services.

OUR MISSION

Even though Switzerland was not affected by the latest episodes of violence and war, times have changed in our country.

We are all aware of the possibilities that exist for criminal and terrorist organizations or disordered people who are desperately enclined to commit odious acts at any time.

Therefore, it has become imperative to raise the level of protection for our citizens and for the economic players.

It is Securserv Technologies's mission to be an important link in the security chain, that's why it proposes: :

- analysis and assessment of the risks faced by companies and organisations of all kinds.

proportionate proposals and responses, largely focused on detection means of high-tech technology.

OUR VALUE

Technology - Accuracy - Valued approach - Reliability

OUR ACTIVITIES

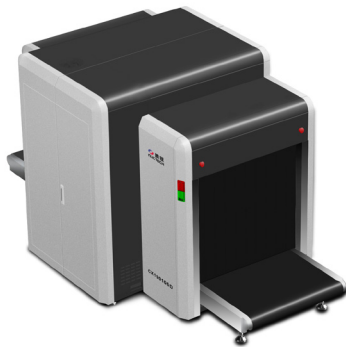

Securserv Technologies SA is the partner of companies, incorporated units, institutions and organisations.

- Intervention prior to an investment decision in the field of security.
- Analysis of potential threats taking into account the political, social or economic environment.
- Adequate proposal for protection focused on detection.
- Availability of equipment and solutions to achieve the chosen objectives.

With our partnership with RUAG DEFENCE, a Swiss company with an international dimension, we ensure the maintenance of the equipment supplied, as well as the initial and ongoing training of operators. Finally, we ensure a monitoring for the benefit of our customers.

OUR RESPONSIBILITY

As security experts, we need to stand by each of our customers to understand their needs and bring them to the right level of security, ensuring that our recommendations for solutions are financially justified and reasonable.
