

ASTORtex 12351

Double sided tape based on UV-crosslinked Acrylate. Transparent, water resistant, ideal for lamination of felt, foams, carton, textiles etc.

Product Properties & Applications

- Very good temperature resistance and resistance to shear
- Transparent and water resistant
- Good resistance to plasticizers and to ageing
- For lamination of felt, foams, carton, textiles etc.
- Available as rolls of 6 - 1000 mm width or as cuts of various dimensions

Technical Data

Adhesive	UV crosslinked acrylate
Carrier	special thin paper
Liner	brown siliconized paper
Thickness of tape	ca. 0.13 mm
Adhesive strength DIN EN 1939	ca. 15 N/ 25 mm
resistance to shear – dynamic	70 N/cm ²
Temperature resistance	-30°C bis +150°C
Ageing resistance	Very good
Resistance to plasticizers	Very good
Resistance to condensated water	Very good

All data are single values and are not to be considered as specifications We recommend to perform own tests to ensure suitability.
