

GORLA 2025/2026

the headquarter
since 1988

the Group

Founded on May 2, 1988, as a traditional body shop, GORLA has grown over the decades to become a benchmark in the Mendrisiotto area and throughout the Ticino region. Thanks to solid experience in the repair sector and a constant drive for innovation, the company has progressively expanded its range of services to meet the evolving needs of its clients.

Today, GORLA offers far more than bodywork repairs. The company specializes in glass replacement and repair for both light and heavy vehicles, window tinting and decorative films for cars and buildings, full and partial car wrapping, paint protection film (PPF) applications, digital printing, and custom vehicle graphics for both interiors and exteriors.

Completing the offering is a rental service for cars and electric vehicles, along with a newly established, fully equipped mechanical workshop. This dedicated space handles vehicle inspections, routine maintenance, and a wide range of technical interventions on all types of vehicles, reinforcing GORLA's commitment to being a one-stop solution for private and commercial mobility needs.
